

Rainbow

Nurturing Vibrant Fish

Rainbow Floating Pellets

Rainbow Floating Pellets are nutritionally balanced fish food formulated for aquarium fishes. **Suitable for all fishes**, this unique blend of ingredients contain highly digestible proteins. These are the key factors to healthy growth, strong immunity and vibrant colours.

Due to the **high digestibility**, Rainbow fish food ensures low wastage and effective assimilation of nutrients. The clean and clear water formula keeps the fish tank pristine and healthy with **minimum water pollution**.

What sets Rainbow fish food apart ?

Low food wastage = fewer water changes

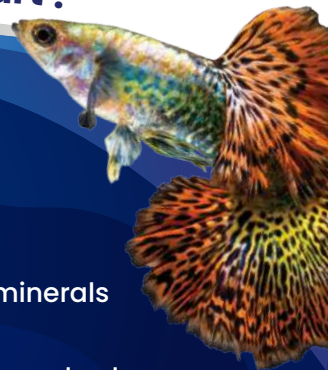

Enriched with Proteins and Fats for improved vibrancy of fish

Immunity boost from essential vitamins and minerals

Astaxanthin from natural ingredients for enhanced colours

Rainbow range of pellets are designed to float thus promoting active surface feeding and ensuring digestion. A unique and versatile formula that is suitable for a wide variety of freshwater ornamental fishes, of different life stages based on their size.

MICRO FLOATING PELLET-0.9mm Dia

MINI FLOATING PELLET-1.8mm Dia

SMALL FLOATING PELLET-3.5mm Dia

MEDIUM FLOATING PELLET-5.5mm Dia

Directions for use

Store in a cool, dry place away from sunlight.

Feed twice a day as much as the fish can consume within 5 minutes.

Maintain good water quality for healthy & active lifespan of your fish.

Quality, No compromise.
